

Letter of Recommendation

Tuesday October 8th, 2018

Dr. Anis Mjirda
31-33 rives de Clausen, Luxembourg

To Whom It May Concern:

It's my pleasure and honor to recommend Noor for the position Software engineer. I have known Noor El Amal for one year between 2013 and 2014 as an Assistant Professor with the Department of Computer Science at University of Science Gafsa

In this context, I can personally vouch for Noor for her consistently brilliant academic performance and dedicated attitude to her studies. She is very intelligent, inquisitive and seeks to gain in-depth knowledge in everything she pursues. With her determination and hard work, I have no doubt that she will succeed in all her future endeavors.

In 2013, Intel and EFE (Education for Employment) ranked Noor's project "Ensaan" amongst the best executed projects at University of Science Gafsa and won the national prize. She has shown true dedication and motivation in her studies and this is why I believe she is fit to complete her post graduate studies and research successfully.

In my view Noor El Amal will make an outstanding software engineer. I recommend her for this position within your company. Should you require any other information please do not hesitate to contact me.

Yours truly,

Dr. Anis Mjirda
Operations Research Scientist at amazon.com
Former Assistant Professor at University of Gafsa (Sept 2013-March 2016)
